### **Abstract**

Join us for an insightful panel discussion where senior fellows share their personal stories of challenges and missteps in their academic journeys. This 1.5-hour event aims to destigmatize failure and build resilience among junior fellows by exploring topics such as defining and understanding different types of failures, navigating mistakes in data collection and analysis, handling rejections, and successfully managing academic careers. With an informal and engaging format, the discussion will provide valuable lessons and practical advice on turning setbacks into opportunities for growth.
